

**Amendments to the Specification:**

**Please replace the paragraph at page 2, line 21–page 3, line 4 with the following amended paragraph:**

As shown, as the EPG information displayed on the TV screen, broadcasting channel information, broadcasting time information, broadcasting program title information according to each channel and time are displayed as a list form. According to this, the user certifies EPG information through the TV screen, selects his desired program information according to broadcasting starting time, finishing time, and program summary information thus to watch a corresponding broadcasting program received through the broadcasting channel, or reservation-records a broadcasting program through the VCR-300\_5 with reference to the broadcasting program information.

**Please replace the paragraph at page 16, line 17-21 with the following amended paragraph:**

As shown, the packet data includes a packet header for informing a data content, a subscriber's PDA information, reservation-recording information, ~~mode~~ modem information, and etc., and is stored in the home PVR. As aforementioned in FIG. 10A, the reservation-recording information includes channel information, time information, category information, and etc.
